

TUBERS OF THE CONGO YAM. (*Dioscorea cayenensis* LAM., S. P. I.  
No. 54901.)

The Congo yam, shown above greatly reduced in size, has rich yellow flesh strikingly different from all other yams commonly grown. While the flavor is not so delicate as that of many other yams, the texture is good and the color attractive. The average weight of tubers, when grown under favorable conditions, is 4 to 5 pounds. (Photographed by E. L. Crandall, Washington, D. C., March 20, 1922; P27535FS.)
